SUMMARY

Junior Computer Science student at the University of Maryland building mobile and full-stack projects with React Native, Next.js, TypeScript, FastAPI, and Supabase. Projects include a worship team app and a multiplayer webcam game using WebSocket and MediaPipe, with prior leadership experience as a KATUSA squad leader in U.S. Army CID.

EDUCATION

University of Maryland

College Park, MD

B.S. in Computer Science, Minor in Mathematics | GPA: 3.7/4.0

Expected May 2028

- **Courses:** Algorithms, Computer Systems, Organization of Programming Languages, Web Programming, Linear Algebra, Applied Statistics
- **Honors:** Dean's List (Spring 2023, Fall 2025, Spring 2026)

TECHNICAL SKILLS

Languages: Java, C, JavaScript, TypeScript, Python, OCaml, Rust, MATLAB

Frameworks/Libraries: React, Next.js, React Native, Expo, FastAPI, Tailwind CSS, MediaPipe

Tools/Platforms: Supabase, Git, GitHub, Vercel, Render

PROJECTS

Timbre | *React Native, Expo, TypeScript, FastAPI, Supabase*

Jan 2026 – Present

- Built a cross-platform worship team management app that centralizes **team membership, weekly setlists, song lineups, and rehearsal resources** using React Native, Expo, TypeScript, and Supabase.
- Enabled users to create or join teams through **six-character invite codes** and receive membership-specific dashboards and setlist permissions by implementing Supabase Auth, relational membership data, and row-level security policies.
- Converted multiple uploaded sheet-music images into a **single multi-page practice PDF** by building a FastAPI pipeline that stores generated files in Supabase Storage and renders them in-app through React Native WebView.

GhostDieDie | *React, Three.js, MediaPipe, FastAPI, WebSocket, Supabase*

Apr 2026

- Collaborated on a four-person team to build a **browser-based, real-time two-player 3D fighting game** with room creation, character customization, arena selection, best-of-three combat, and webcam body controls.
- Enabled **nine combat and movement inputs at approximately 20 FPS** by extracting pose landmarks with MediaPipe Pose Landmarker and designing custom detectors using player calibration, landmark velocity, dynamic 2D body-zone transitions, visibility checks, and cooldown filtering.
- Removed the requirement for full-body camera framing by designing detectors using **only nose-to-hip landmarks** to recognize punches, kicks, jumps, headbutts, and directional movement, allowing players to remain close enough to view their laptop screens.

Personal Portfolio | *Next.js, TypeScript, Tailwind CSS*

Jun 2026

- Built and deployed a **responsive single-page portfolio** at choijunho.com using Next.js, TypeScript, and Tailwind CSS to showcase projects, experience, skills, and contact information.
- Created a **typed, data-driven component architecture** for generating project cards, detail modals, experience entries, and skill grids; added persistent themes, responsive navigation, Lenis smooth scrolling, and GSAP animations.

EXPERIENCE

Battalion Maintenance Specialist & Squad Leader

Oct 2023 – Apr 2025

US Army Criminal Investigation Division (KATUSA)

Camp Humphreys, South Korea

- Led a **7-person KATUSA squad** in daily accountability, onboarding, physical training, and roll-call briefings in a bilingual U.S.-Korea military environment.
- Created a **vehicle maintenance SOP** for mission-essential CID vehicles, standardizing monthly inspections, readiness documentation, and records for assigned M17/M18 pistols and M4 rifles.
- Interpreted **Korean-English communications during joint investigations** involving U.S. Army CID, Korean National Police, and Korean Criminal Investigation Group.

HONORS & AWARDS

Best Razzle Dazzle Hack, Bitcamp 2026 – Awarded among 600+ participants

Army Commendation Medal (ARCOM) – Awarded for service with U.S. Army Criminal Investigation Division
